Biography:

Dr. Jennifer Engle completed her PhD in Clinical Psychology at the University of Victoria (neuropsychology track) in 2009. She completed an APA and CPA accredited internship at The Hospital for Sick Children in Toronto, Ontario, with specialization in neuropsychology. She has been licensed to practice psychology in British Columbia since 2010.

Dr. Engle currently works at Sunny Hill Health Centre for Children, part of the British Columbia Children's Hospital. Her primary interest is neuropsychological assessments for children with complex developmental disabilities, epilepsy, and acquired brain injury. She currently works on the Complex Developmental and Behavioural Conditions (CDBC) team, the Neuromotor Program, and the Acute Rehab team. She has extensive experience assessing complex children, including those with severe sensory and motor disorders.
