Biography:

Lois Oberlander Condie, Ph.D., is a faculty member affiliated with Boston Children's Hospital Boston/Harvard Medical School who has taught on an adjunct basis at Boston College, Boston University, Brandeis University, and Harvard University. She has taught and supervised assessment training at Boston Children's Hospital, U-Mass Medical School, and the University of Virginia. She received her master's and doctoral degrees from the University of Nebraska-Lincoln.

Dr. Condie is board certified in neuropsychology with the American Board of Pediatric Neuropsychology, and dually board certified in clinical and forensic psychology with the American Board of Professional Psychology. Her research and practice focuses on service provision to vulnerable populations, brain and vascular malformations, cerebral palsy, agenesis/dysgenesis of the corpus callosum, genetic syndromes, autism, CHARGE, infantile seizures and hemispherectomies, Dandy Walker syndrome, intraventricular hemorrhage, and other brain conditions.

She also is a nationally recognized expert on evaluations of children and families involved with the care and protection system, child protection policies and regulations, children's learning needs and associated policies and regulations, preservation of human rights for vulnerable populations internationally, psychological and legal conceptions of privacy, and ethics in psychological practice. She is a Fellow of the American Psychological Association and she has served on national committees relevant to ethics and standards of practice, family law, family privacy, neuropsychology, and forensic psychology. She is the author of many journal articles and book chapters.
