Biography:

Dr. Sean O'Brien is a licensed psychologist and board certified pediatric neuropsychologist with a specialty in the assessment of children and adolescents with mild to moderate neurodevelopmental disabilities, such as High Functioning Autism, Asperger's Disorder, and Nonverbal Learning Disorder. Dr. O'Brien completed his doctorate in Clinical Psychology at the University of Hartford, his pre-doctoral internship at Worcester State Hospital/University of Massachusetts Medical School, and his postdoctoral training in Pediatric Neuropsychology at both Harvard Medical School (McLean Hospital and Cambridge Health Alliance) and Lesley University. He is a former Assistant Professor in the Department of Psychiatry at the University of Massachusetts Medical School and also worked at Lesley University in both a clinical and academic capacity before transitioning to private practice in 2010.
