Biography:

Dr. Aviv is a bilingual (Hebrew / English) licensed clinical psychologist and the only American board certified pediatric neuropsychologist in Israel and the Middle East. Dr. Aviv specializes in the assessment and treatment of multilingual, multicultural children, and adolescents. After relocating back to Israel from Saint Louis, MO in 2014, she sees local and international patients and their families at her diagnostic and treatment clinic in Raanana. Dr. Aviv has extensive experience and expertise in accurate diagnosis of ADHD, learning difficulties, dyslexia, autism spectrum, developmental issues, emotional disorders, behavioral disorders, adjustment difficulties, and marital and family issues. Dr. Aviv uses a wide range of empirically validated treatment modalities and is the only experienced Israeli provider of Cogmed, an evidence based cognitive therapy program for individuals with poor working memory, a common weakness in children and adults who have been diagnosed with ADHD, and is now offering Mc² – a new intervention program for complex ADHD and Learning Disabilities. Dr. Aviv also runs a variety of psychotherapy groups, and gives lectures, workshops and presentation both locally and internationally.
